

# MICROSOFT COPILOT READINESS CHECKLIST

## 1. Microsoft 365 Identity & Security

- Multi-Factor Authentication (MFA) enforced for all users
- Conditional Access policies configured
- No legacy authentication enabled
- Global admin roles reviewed & minimized
- Secure Score evaluated and baseline improvements identified

## **2. Data Governance & Permissions**

- SharePoint & Teams permissions reviewed for oversharing
- External sharing policies defined and enforced
- File/folder permissions audited for sensitive data exposure
- Retention policies configured and documented

## **3. Microsoft 365 Configuration**

- Licenses reviewed for Copilot compatibility (M365 E3/E5, Business Premium)
- Inactive Teams/SharePoint sites identified
- Mailbox and OneDrive storage organized & compliant
- Third-party apps reviewed and approved

## 4. AI Governance & Security Controls

- AI usage policy drafted or established
- Business rules for safe AI output defined
- Data loss prevention (DLP) readiness reviewed
- User access groups structured to prevent accidental exposure

## 5. Organizational Readiness

- Executive team aligned on AI adoption goals
- Training plan drafted for end users
- Communication plan for rollout established

## 6. Your Copilot Go/No-Go Indicators

- Environment is secure (identity + access + governance)
- Data is structured and accessible to the right people
- Licensing is aligned with Copilot requirements
- Staff understands AI usage expectations
- Leadership approved the roadmap for rollout
